

How to request an Agency Staff ID using My Agent Self Service

 **Start Chat**

Agent & District Staff Validation Process

In an effort to enhance our safeguards for confidential consumer and business information, Farmers® follows the following processes for granting agent staff and district manager staff access to its systems. The process includes a background check requirement and an appointment process for licensed candidates.

Agent & District Staff Validation Process

In an effort to enhance our safeguards for confidential consumer and business information, Farmers® follows the following processes for granting agent staff and district manager staff access to its systems. The process includes a background check requirement and an appointment process for licensed candidates.

1. Request for Agency Dashboard credentials

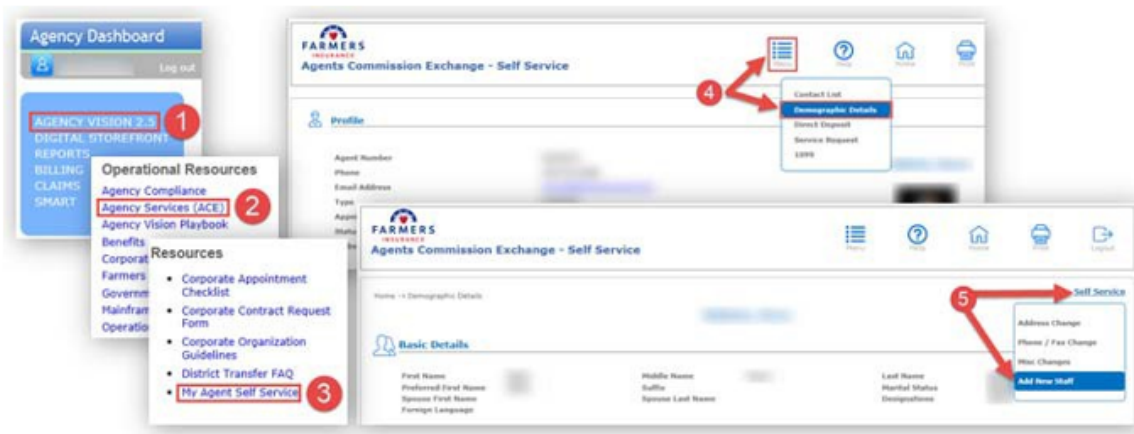

Agents and district managers can request Agency Dashboard credentials for their new staff through the My Agent Self Service (MASS) portal using the "Add New Staff" option.

Agent uses My Agent Self Service to submit requests for the following candidate types:	District Manager uses My Agent Self Service to submit requests for the following candidate types:
AP - Agency Producer AS - Additional Staff (non-appointed staff)	DCSR - District Customer Service Representative FM - Field Manager AS - Additional Staff (non-appointed staff)

Agents or district managers complete the "Add New Staff" screen and submit the request to start the background check process for their new staff.

Licensed Candidate with Appointment Requests: The candidate will need to complete the licensed staff background check before any system access is granted. The cost for the review will be \$47.50 (not including any state specific fees) and has to be paid at the time of submission with the vendor, Business Information Group.

Once submitted, the new staff member will receive an email from Business Information Group to complete their application and submit payment. Agency Dashboard credentials will not be activated until the background check is completed with a passed result.

NOTE: District managers can continue to use ACE to start the process for the following candidate types:

- Reserve Agents
- Farmers Life Agents
- Other District Staff (DLS, DMTAA, ABC, and RFM)

2. Review the Request Status

Agents and district managers can review the status of their submitted requests in MASS under the “Pending Staff Information” section. As the background check process proceeds, the CBR Status, CBR Result, and CBR Review Date will update.

Pending Staff Information							
Staff Name	Type	Application Status	Application Date	CBR Status	CBR Result	CBR Review Date	Connect to BIG
	AS -Traditional	Submitted	01/22/2018	CBR Request Sent to Candidate			email Candidate Withdraw

3. Finalize the Request

If the background check is passed, a new staff record will display in MASS under the “Staff Information” section. The manager of the new staff member will receive two automated emails containing the Agency Dashboard credentials. The new staff member will be listed as an “Additional Staff” candidate and will have binding authority dependent on their license and appointment status.

Staff Information							
Role - Name	Series Code	Primary Resident License Info	Bristol West Producer Code	Foremost Producer Code	EA Agent code	Additional Agency Association	Termination Date
CSR -	4	AL, Expiration Date:2019-12-31				No	Terminate

If the background check is not passed, the candidate will receive notification regarding their status from Business Information Group and the “Pending Staff Information” section will update regarding the background check status.

4. Convert to Appointed Candidate

Additional staff candidates can be converted to appointed candidates on appointment approval from the Companies once they are licensed and have completed the licensed candidate background review with a passed result. The agent or district manager will need to work with the district or territory office to initiate the applicable contracts.

Agents and district managers can review the status of their submitted requests in MASS under the “Staff Information” section. As the appointment process proceeds, the candidate's Role, Series Code, License, and Producer Code information will update.

The candidate will continue to use the original Agency Dashboard credentials, and the binding authority will automatically update as their appointments and contract are processed.

5. Maintenance of Agency Dashboard Credentials

Agents and district managers can submit deactivation requests in MASS under the “Staff Information” section by clicking the “Terminate” link. The request will initiate system credential deactivation, and termination of any appointment agreements and associated appointments for the staff member. The agent will receive an automated email confirming that the termination is accepted, and the “Staff Information” section will update with the new status.

Agents and district managers will be asked to complete a quarterly recertification survey to update their list of active staff with system access. If a user is flagged as “Active”, no action will be taken. If a user is flagged as “Inactive”, their profile will be deactivated and the termination process noted above will be initiated.
